

# ASHRAE MEETING MINUTES – ST LOUIS

## TC 2.3 - Gaseous Contaminants/Removal Equipment Handbook Sub-Committee Meeting

Monday, June 27, 2016

4:15-6:00 p.m.

Marriott Conference Plaza, Street Level, Landmark 1

The meeting was chaired by Ashish Mathur. Participants introduced themselves. Present were:

Ashish Mathur  
Nick Agopian  
Sanjeev Hingorani

Gemma Kerr  
Paula Levasseur  
Lu Liu

ASHRAE Liaison Ramesh Paranjpey did not attend the meeting.

TC 2.3 is responsible for editing two handbook chapters. These are:

- Applications Chapter 46 – Air Cleaners for Gaseous Contaminants; and
- Fundamentals Chapter 11 – Air Contaminants.

The main item on the Agenda was completion of Chapter 11 revision to allow an approval vote by the TC at Tuesday's meeting. Revision was completed with the exception of the following non-substantive items to be dealt with after St Louis:

- Gemma to rearrange the superscripts in the last column of Table 6, which are out of order following Chang-Seo's splitting the Table into inorganic and organic contaminants;
- Gemma to add references relating to 3D printer emissions;
- Incorporate Lu Liu's material on institutional and educational IAQ after the first paragraph of the section on institutional, commercial and residential IAQ. This material was reviewed and approved at the meeting;
- Ashish to supply the full reference Vesper et al., presently incomplete.

Because of Nick's computer problems, it was not possible to replace old references in Chapter 11 as intended. Gemma reported that Handbook Chair Brian Krafthefer wants to continue work on finding replacement references after submission of the Chapter.

Nick recommended that the Subcommittee run more teleconferences as part of Chapter revision efforts. Gemma and Brian also support teleconferences.

The meeting was adjourned at 5:50 pm.
